

BIAGIO SPADA

Catania, Sicily, Italy | +39 351 548 79 78 | bgisp98@gmail.com | LinkedIn: linkedin.com/in/biagio-spada

PROFESSIONAL SUMMARY

Operations professional with 7 years of experience transitioning to Business Analysis and Commercial Operations roles. Proven track record in data-driven process optimization: 10-20% cost reduction, workflow improvements, and KPI implementation. Experience supporting commercial teams through operational excellence, tools development, and cross-functional collaboration. Technical skills in SQL, Python, Excel/VBA, and Power BI for data analysis, reporting, and decision support. Strong business acumen from managing teams of up to 10, budgets, and stakeholder relationships in fast-paced food service operations.

CORE COMPETENCIES

Data Analysis & BI: SQL • Power BI • Excel (Power Query, Pivot Tables, VBA) • Python (Pandas, NumPy)

Business Analysis: Process Mapping • KPI Design • Cost-Benefit Analysis • Requirements Gathering • Variance Analysis

Domain Expertise: Budget Management • Inventory Optimization • Performance Tracking • Stakeholder Management

PROFESSIONAL EXPERIENCE

Operations Manager

Pizzeria Bistrò 47, Catania, Italy | Jan 2022 – Jan 2025

- Built and maintained operational tools (Excel dashboards with VBA automation) used daily by 10+ team members for tracking costs, revenue, and margins; reduced reporting time by 40% while improving data quality
- Designed standardized workflows for inventory management and shift planning, ensuring consistency across operations and enabling scalability
- Acted as operational partner for management team, providing analytical support for pricing decisions, menu optimization, and promotional strategies through trend analysis and forecasting

Store Manager

Ristorante Fichera, Catania, Italy | Mar 2020 – Dec 2022

- Achieved **20% cost reduction** in 12 months through detailed cost analysis, waste area identification, and optimized procedures implementation
- Managed operational budget, performed monthly variance analysis, and created quarterly forecasts with alternative scenarios
- Conducted customer segmentation analysis, identified purchase patterns, and developed targeted promotional strategies with **+35% ROI**
- Mapped operational processes, identified bottlenecks, and redesigned kitchen-dining workflow reducing service times by **18%**
- Standardized supplier management processes and implemented hygiene controls, ensuring data quality and cost tracking consistency across 15+ vendor relationships

Sales & Customer Service Representative

Tipografia Spada, Sicily, Italy | Jan 2018 – Dec 2019

- Provided technical consulting to clients on graphic and digital solutions for customized products
- Increased average order value by **22%** through strategic cross-selling based on customer needs analysis

TECHNICAL SKILLS

Data Analysis & BI: SQL (complex queries, joins, aggregations) • Power BI • Excel Advanced • Python (Pandas, NumPy, Matplotlib)

Languages: Italian (Native) • English (B1 - Professional working proficiency)

PROJECTS

Big Ambitions Business Analyzer

Personal Project | Python, Streamlit, Pandas | 2024–Present

- Developed an interactive business analytics dashboard using Python and Streamlit to simulate and optimize financial performance across multi-location retail scenarios

- Implemented dynamic KPI visualizations and what-if analysis features, applying data-driven decision-making principles to operations management use cases

Competitive Intelligence Platform – Food & Beverage

Personal Project | Python, Streamlit, Pandas, Yelp API, Claude API | 2024–Present

- Built a Streamlit dashboard integrating Yelp Fusion API to collect and aggregate competitor data (ratings, reviews, geolocation, category) across the restaurant sector, processed with Pandas into a structured dataset
- Integrated Claude API (LLM) to automatically generate analytical reports with competitive landscape insights and market opportunity identification, applying prompt engineering to produce structured, actionable output

Power BI Analytics Portfolio

Certification Project | Power BI, DAX, Power Query | 2024

- Built end-to-end Power BI reports as part of PL-300 certification preparation (in progress): data import and transformation, semantic model configuration, DAX measures, and interactive dashboards
- Applied data modeling and visualization techniques to real-world restaurant and retail datasets, demonstrating ability to translate raw data into actionable business insights

EDUCATION

Diploma in Accounting & Business Administration | Istituto Superiore Enrico Fermi, Vittoria, Italy

University Studies in Physics (2 years) | University of Catania - Strong mathematical and analytical foundations
